🔑 SaiPraneeth2713

Summary

Final-year B.Tech Computer Science (AI & ML) student with experience building AI and full-stack applications using React and SQL(backend). Passionate about AI-driven product development, problem solving, and working on real-world engineering challenges.

Education

Gokaraju Rangaraju Institute of Engineering and Technology, Hyderabad B.Tech in Computer Science and Engineering (AI and ML)	Nov 2022 – Present CGPA: 6.85
Sri Chaitanya Junior Kalasala, Hyderabad Class XII (Intermediate Education)	July 2020 - June 2022 Percentage: 88.0%
Sri Chaitanya Techno School, Hyderabad Class X (Secondary Education)	June 2019 – March 2020 Percentage: 95.0%

Technical Skills

Programming and Data Skills: Python, SQL
Web Development: React , HTML, CSS, JavaScript
Databases: MySQL , MongoDB
Tools & Platforms: Git, GitHub, VS Code
Soft Skills: Problem solving, teamwork and collaboration, time management, creativity

Projects

- Human Activity Recognition System (CNN + LSTM) | CNN , LSTM , Deep learning** GitHub
- Developed a CNN-LSTM based HAR system for real-time action recognition by combining spatial and temporal feature learning.
 - Applied in security systems, smart home automation, and healthcare monitoring.
 - Combined CNN-based spatial feature extraction with LSTM-based temporal sequence learning.
- CogniAlert: EEG-based Emotion Recognition | CNN , LSTM , Deep Learning**
- Cognialert is a real-time intelligence system that monitors neural activity and predicts potential crises.
 - It uses a Hybrid CNN-LSTM model with 2,548 features to analyze spatial and temporal brain patterns
 - The system achieves 96.44% accuracy in classifying emotions as negative, neutral, or positive using Z-score standardization and the Adam optimizer.

Certifications

- Responsive web design Certification - Freecodecamp
- Power BI certification
- Microsoft Azure AI fundamentals certification
- Android Developer Virtual Internship - Eduskills
